

PS4

Adam Matthies

February 18, 2025

I am still undecided if I will do my final project over something macroeconomic or baseball related. If I do it over a macroeconomic issue—I will use data from the CME group and/or FRED. If I do it over something baseball related—I will use data from Baseball Savant and/or FanGraphs.

I attempted the fix (still don't know if I did that correctly either) but my terminal would have a spasm when trying to install sparklyr.
